

To Who it my Concern:

We at Preferred Energy Consultants have been testing and inspecting homes for Morris Wood Enterprises for close to three years. As a RESNET Certified third party HERS rating company, we work with over one hundred builders and test thousands of homes per year, and Morris Wood Enterprises has consistently proven to be a market leader in quality. They not only build to the most stringent of codes, but are consistently pushing pass this threshold. I find Morris Wood Enterprises very easy to work with and would recommend them to anyone looking for a long lasting, well built home.

Troy Zimmerman

Manager/HERS Rater
